PROFESSIONAL SUMMARY

Final-year B.Sc. Information Technology student with hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js), backend API development, and database design. Completed industry-recognized job simulations in technology risk, cybersecurity, and backend engineering (Forage: EY, Mastercard, Deloitte Australia, Commonwealth Bank). Strong foundation in Data Structures & Algorithms, DBMS, Operating Systems, and Software Engineering principles, combined with proven communication and cross-functional collaboration skills. Seeking a Full-Stack Developer / Technology Consulting role to apply front-end and back-end engineering skills in a fast-paced, client-facing environment.

CORE COMPETENCIES

Full-Stack Web Development • MERN Stack (MongoDB, Express.js, React.js, Node.js) • RESTful API Design • Database Design & Management (SQL, MongoDB) • Object-Oriented Programming (Java) • Data Structures & Algorithms • Software Development Life Cycle (SDLC) • Version Control (Git/GitHub) • Responsive Web Design • Cybersecurity Fundamentals • Technology Risk Awareness • Agile Collaboration • Problem-Solving • Communication & Stakeholder Interaction • Quick Learning & Adaptability

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, HTML5, CSS3, JavaScript, Responsive/Mobile-First Design

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MongoDB Atlas, Mongoose, MySQL, SQL

Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Software Engineering

Tools & Platforms: Git, GitHub, VS Code, Postman, GitHub Pages

PROJECTS

E-Commerce Book Store — *Personal Project*

- Designed and developed a responsive front-end for an e-commerce book store using HTML, CSS, and JavaScript, focused on intuitive browsing and a smooth purchase-flow user experience.
- Currently extending the platform into a full-stack MERN application by building a Node.js/Express.js REST API and MongoDB data layer to support product listings, cart, and order management.

NASA APOD Explorer — *Personal Project*

- Built a full-stack web app with an HTML/CSS/JavaScript frontend and a Java Spring Boot REST API backend, integrating NASA's Open API to fetch and display daily astronomy data.
- Designed a MySQL database layer (Spring Data JPA/Hibernate) to cache daily astronomy data and persist user favorites, reducing redundant external API calls.

CERTIFICATIONS & JOB SIMULATIONS

- EY Technology Risk Job Simulation — Forage
- Mastercard Cybersecurity Job Simulation — Forage
- Deloitte Australia Cyber Job Simulation — Forage
- Commonwealth Bank Backend Engineering Job Simulation — Forage
- Fundamentals of Digital Marketing — Google
- Blockchain Workshop, Cognizance 2025 — IIT Roorkee

EDUCATION

B.Sc. Information Technology — *Shri Guru Ram Rai University, Dehradun*

LANGUAGES

English (Fluent) • Hindi (Native)
